

Viv's Case Study

Supporting Reablement, Independent Living and Wellbeing with Dementia

IN PARTNERSHIP WITH

SUMMARY

GenieConnect® was pivotal in supporting Viv in her late 90s, living with dementia, to maintain her independence and wellbeing. Viv's achieved her goals through consistent reminders and a tailored reablement package, with remarkable success in ensuring she remained hydrated and had regular meals. This case underscores the importance of technology in enhancing the quality of life for individuals with specific care needs while providing peace of mind to their families.

CHALLENGES

In her late 90s, Viv faced the challenge of managing daily tasks while living with dementia. Although she had the capacity to make decisions and maintained good verbal communication, her family were concerned about her wellbeing. The primary challenges included ensuring that Viv received regular nutrition, hydration, medication reminders, and mood-tracking support while maintaining her independence.

SOLUTION

GenieConnect® became the solution to address Viv's needs and provide peace of mind to her family. Initially hesitant, Viv agreed to use GenieConnect® at her daughter's insistence, who was concerned about her wellbeing. The system was configured with three daily nutrition reminders, four daily hydration reminders, and daily mood reminders. Additionally, a support call was scheduled for regular check-ins.

RESULTS

Supporting Independent Living and Wellbeing

GenieConnect® effectively supported Viv in maintaining her independence while addressing her specific needs. The system provided regular meals, hydration, medication, and mood-tracking reminders, prioritising her wellbeing.

● Successful Reablement Package

With the help of GenieConnect®, Viv was able to achieve her reablement goals. A package of 5 hours of care per week was provided, and GenieConnect® played a crucial role in supporting her with regular meals, hydration, medication adherence, and mood management. Viv no longer required ongoing support, and her reablement was fully accomplished.

● Nutrition and Hydration Success

GenieConnect® contributed to Viv's wellbeing by achieving an impressive **80% success rate for nutrition reminders and a 78% success rate for hydration reminders**. The system ensured she received the necessary support to maintain her health and overall quality of life.

● Avoided Travel Time and Net Zero Impacts

The hours of care avoided saved travel time for care workers and contributed to reduced carbon emissions and a smaller environmental footprint, aligning with Net Zero initiatives. Demonstrating how technology can support care recipients and environmental sustainability.
